

1/2

of women and up to
1/4 of men over age 50
will break a bone
due to osteoporosis

Over 1/3

of patients with
a hip fracture
had a prior fracture

50%

of osteoporosis-related
repeat fractures can be
prevented
with appropriate treatments

After a fracture,

4 out of 5
women over 67
are not tested or treated
for osteoporosis

2 many. 2 often.

Every year, there are 2 million bone breaks that are no accident. They are the signs of osteoporosis. If our generation lets osteoporosis keep hiding, we're giving it the chance to break us bone by bone. Please, if you or someone you love has a break, request a simple test for osteoporosis. Because 2 million is 2 many.

Share these numbers
2 help us change them.
